

Goal:

Product owners want to make an application to calculate working hours of co-workers working with "Daily wage" billing.

Team Capacity:

5 Developers, 5 UI/UX designers, 2 Senior developer and the Team Manager.

Product backlog:

Note: There are three categories of users (co-worker, supervisor or accountant)

- Users define which the co-workers, supervisor, or accountant.
- Users add their credit cards information to be able to transfer their money.
- Users can be able add their starting and ending hours.
- A supervisor can be able to approve or not approve the right working hours.
- An accountant can be able to transfer money to the co-workers' account.

Team assignment:

Each member in the team will distribute the tasks.
